

AUTONOMOUS TRAVEL

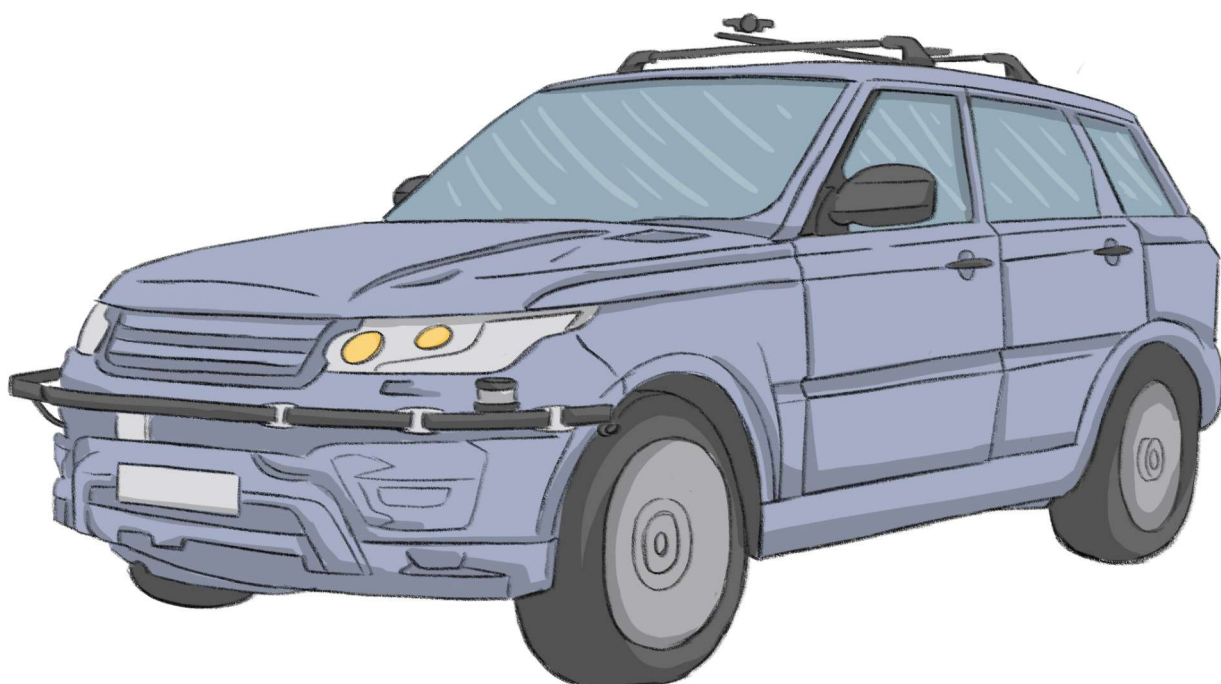

The '2016 Sport Range Rover Autonomous' is a self-driving car that uses lots of hi-tech equipment to get around safely.

Self-driving, or autonomous cars, are said to have many advantages compared to normal cars, some of the biggest are:

- Safer and faster travel with fewer accidents
- A decrease in wasted fuel by around 10%
- A drop in harmful pollution by as much as 60%

You may not see a lot of Autonomous cars on the roads today, but the UK is already a world leader in self-driving vehicle innovation.

Can you circle the 3 differences between the two cars?
